**Scientific advisor: Axmedova Nodira**

Teacher, The Department of Integrated Course of English Language

Tashkent, Uzbekistan

Email: nodirabegimahmedova784@gmail.com

**Annotation:** This thesis explores the ethical implications of integrating artificial intelligence (AI) into language education. It examines issues such as data privacy, algorithmic bias, teacher-student dynamics, and dependency on technology. The study emphasizes the need for balanced and ethical implementation of AI tools to enhance learning while protecting human values.

**Keywords:** Artificial intelligence, language education, ethics, privacy, algorithmic bias, education technology

**Annotatsiya:** Ushbu ilmiy ish sun'iy intellekt (SI) texnologiyalarining til o'rganish jarayoniga tatbiq etilishi bilan bog'liq axloqiy muammolarni o'rganadi. Ma'lumotlar maxfiyligi, algoritmik tarfakashlik, o'qituvchi-va talaba o'rtasidagi munosabatlar hamda texnologiyaga bog'liqlik kabi masalalar tahlil qilinadi. Tadqiqotda o'quv jarayonini yaxshilash bilan birga insoniy qadriyatlarini himoya qilish uchun SI vositalaridan axloqiy va muvozanatli foydalanish zarurligi ta'kidlanadi.

**Kalit so'zlar:** Sun'iy intellekt, til o'rganish, axloq, maxfiylik, algoritmik tarfakashlik, ta'lim texnologiyasi

**Аннотация:** Данная работа рассматривает этические аспекты внедрения искусственного интеллекта (ИИ) в процесс изучения языков. Анализируются такие вопросы, как конфиденциальность данных, алгоритмическая предвзятость, отношения между преподавателем и учеником, а также зависимость от технологий. В исследовании подчеркивается необходимость этического и сбалансированного использования ИИ для улучшения обучения при сохранении человеческих ценностей.

**Ключевые слова:** Искусственный интеллект, изучение языков, этика, конфиденциальность, алгоритмическая предвзятость, образовательные технологии.

**Introduction:** The integration of artificial intelligence (AI) into language education has revolutionized the way learners interact with content, instructors, and one another. AI-powered tools such as intelligent tutoring systems, automated essay scoring, speech recognition, and personalized learning platforms have made language learning more accessible and adaptive. However, alongside these benefits come significant ethical considerations that must be addressed to

ensure that the use of AI aligns with educational values and human rights. One major ethical concern is data privacy. AI systems often collect vast amounts of personal information from learners to tailor educational content. If not properly managed, this data can be misused, leading to breaches of confidentiality and potential harm to students. Educational institutions and developers must implement robust data protection measures and be transparent about how data is collected, stored, and used.

Another issue is algorithmic bias. Since AI models are trained on existing data, they may reflect and even amplify existing societal biases. This can result in unfair assessments or feedback for certain groups of learners based on their language background, accent, or cultural expressions. It is essential to develop inclusive AI models that consider diversity and fairness in language education. Furthermore, the increasing reliance on AI can alter the traditional teacher-student dynamic. While AI can support educators by automating routine tasks, excessive dependence may undermine the teacher's role in providing emotional support, critical thinking guidance, and ethical reasoning. Teachers must remain central in the educational process to foster holistic development. Finally, there is a risk of over-reliance on technology, which could reduce learners' ability to engage in authentic communication or critical language use. Educators must strike a balance between using AI tools and encouraging meaningful human interaction.

**In conclusion:** the ethical implications of AI in language education are complex and multifaceted. While AI offers promising opportunities to enhance learning, it must be applied responsibly and ethically. Stakeholders—including educators, developers, and policymakers—must collaborate to establish guidelines and standards that safeguard human dignity, promote equity, and support the overall mission of education.
